January/February 2004

Eastchester Extension Ready to Serve

On February 5th, Iroquois placed its Eastchester Extension pipeline into service, opening the door to one of the country's greatest energy markets—New York City. Thirty-six miles of 24-inch pipeline were built from our existing mainline in Northport, Long Island, down Long Island Sound and the East River, to Hunts Point in the Bronx. Through this connection with the Con Edison system in Hunts Point, an additional 230 MMcf/day (million cubic feet per day) of capacity is now available to serve the City's energy needs.

Our pipeline is the first major new natural gas transmission pipeline to enter New York City in some 40 years. This injection of new gas into the marketplace offers New York increased access to gas from western and eastern Canada, the Gulf, and the West.

Behind the scenes are the compressor stations, which move the gas through the pipeline. To support the Eastchester Extension, Iroquois built two new compressor stations, one in Boonville, NY and one in Dover, NY. A second compressor unit was added at our Croghan, NY compressor station, and an equipment upgrade was performed at our Wright, NY sta-

tion. The combined horsepower behind our compressors is approximately 78,000 hp.

A cooling facility, which cools the gas after it comes out of the compressor, was built at the Boonville compressor station. Cooling facilities were also added at our existing Wright and

Athens, NY compressor stations. Cooling the gas contracts it, allowing for a greater throughput (the volume of gas flowing through a pipeline).

Iroquois' Meter and Regulating Station in Hunts Point

In December, while bringing our Boonville and Dover compressors online for testing prior to the start-up of Eastchester, Iroquois actually broke its own throughput record by receiving *and* delivering 1 Bcf (billion cubic feet) of natural gas in one day. And we've done it nine additional times since then.

As of mid-February, we've contracted for 210,000 dth/d (dekatherms per day) on the Eastchester Extension. Our shippers include Amerada Hess, Con Ed, KeySpan Ravenswood, Reliant, and Sempra.

For more information about Iroquois' Eastchester Extension, contact Scott Rupff, Manager of Marketing, at 203-925-7291.

Next time you're on the web, drop by www.iroquois.com to see our redesigned website. Unveiled last autumn, the new site was designed by the marketing and advertising firm of Martino & Binzer (www.goodbait.com) and built by Iroquois' own employees. It's an easy and convenient way to get information about our company. Following is an overview of the site.

IOL Customer Service Center

This is the portal for our customer service center, Iroquois OnLine. This proprietary electronic bulletin board (EBB) allows Iroquois customers to expedite gas nominations and our meter operators to retrieve real-time reports and measurement data. From here, customers can access Customer Activities, IOL Setup & Help, and Informational Postings.

2004 Calendars Still Available. Every year, Iroquois creates a calendar that celebrates our host communities with photographs taken along our right-of-way. This year's calendar features the photographic talents of Jim Herity and Nancy Ann Dawe and was designed by Cole Design Group (www.coledesigngroup.com). If you'd like a complimentary calendar, contact Ann Wheeler at 203-925-7207.
